

Vacancy: Data Project Manager

Overview:

Do you want to use data to help tackle the major health challenges facing London in the 21st Century?

At Impact on Urban Health, we aim to be at the leading edge of philanthropic approaches. Crucial to this is using data and analytics to leverage our impact. We want to work with a broad range of data sets for genuine strategic and tactical insight. This role helps us to accelerate our capability in these fields.

We're looking to recruit an individual with skills in building relationships, critical analysis and project management to join our Data and Analytics team. This opportunity will focus on integrating the use of external data into our urban health work.

For some examples of how we use data, please check out our [Urban Health Index](#), [Mapping a way out of Childhood Obesity](#) in the Financial Times, or [how we tackle major health issues with Tableau](#).

About us:

Impact on Urban Health is part of [Guy's & St Thomas' Foundation](#). Our collective mission is to build the foundations of a healthier society.

There is more information about [working with us](#) under our 'About us' section, where you can find out:
